

Welcome to Finxmarkets – Affiliate Marketing Made Easy

At Finxmarkets, we combine the power of international affiliate marketing with global stock market expertise to help you grow your business.

■ What Is Affiliate Marketing?

Affiliate marketing is a type of business model where individuals (called affiliates or publishers) earn money by promoting products or services.

Big companies like Amazon and Alibaba use this model and pay billions to affiliate marketers worldwide. However, it can be difficult to get started.

■ How Is Finxmarkets Different?

Here's the Finxmarkets difference:

■ We do everything for you.

With Finxmarkets, you don't need to:

- Create a website
- Promote products
- Manage traffic or advertising
- Worry about strategies

We have a powerful team of international marketers, data analysts, and stock market experts who take care of everything for you.

All you need to do is:

1. Create an account with Finxmarkets
2. Fund your account – this money is used for affiliate marketing operations and campaigns
3. Sit back and track your results

Whenever a profitable deal is made through our affiliate network, you earn your share of the profits directly into your account.

■ It's just like working with Amazon or Alibaba — but better, because we do the work for you while you watch your profits grow.
